

EXAMPLE OF THREE-DIMENSIONAL TABLES AND PROGRAMMING

Task:

- Read and store in a table student exam scores of
 - 3 sections
 - 10 students per section
 - 3 exams per student
- Process the values in the table appropriately to yield the following report:

(header, title, date)

SECTION NUMBER 9

STUDENT NUMBER

STUDENT TOTAL SCORE

1	155
2	120
.	.
.	.
.	.
10	163

THE AVERAGE FOR SECTION 9 IS 999.
