EDUC 127 A/B
Field Experience In After School Stem Programs

Orientation to high quality Science, Technology, Engineering, and Mathematics (STEM) instruction.

On campus training includes skills to develop conceptual understanding and the ability to scaffold instruction for K-8 students in STEM after school programs. After completing on-campus training, students are placed in nearby after school programs to teach STEM activities to small groups of children.

For freshman, sophomores, juniors, seniors, and graduates.

Tuesdays and Thursdays 3:00-4:50 pm for the first 3 weeks on campus, then Tuesdays on campus and Thursdays 3-4:50 at after school sites.

If you have any questions about the course, please email the professor, Dr. Jenna Porter, at jmporter@csus.edu.
