Changes to a course's units impact any related programs. As a result, a corresponding change must also be submitted for those programs

**Is the only purpose of this change to update the term typically offered or the enforcement of existing requisites at registration?**

No

**In what term(s) will this course typically be offered?**

Spring term only

**Does this course require a room for its final exam?**

No, final exam does not require a room

**This course complies with the credit hour policy:**

Yes

**Justification for course proposal:**

This course change is being submitted to increase the WTUs for faculty from 0.5 to 1 and increase the student credit units from 1 to 1.5. The change in WTUs would provide additional support for faculty workloads. With this change, faculty supervisors would be able to incorporate meeting time with students and report review into their scheduled "seat time" for clinic rather than outside of this scheduled time. Doing so would improve faculty workloads and decrease the need for additional meetings outside of their scheduled clinical hours.

The change in student units would better distribute clinical hours and improve faculty workload, particularly in a now shortened nine-week summer semester, than the current model. While students are currently set for one half-day of clinic in spring (CSAD 620C) and fall (CSAD 640C) and one full day in summer (CSAD 630C), the change would slightly increase fall and spring clinic time and decrease summer clinic time; this change would support faculty workloads and scheduling now that we have transitioned from a 12-week to 9-week summer semester. The change to 9 weeks required additional hours outside of clinic time to ensure students met the required number of clinical hours; this change in student units will mean that students will have fewer hours to complete without a need for additional hours outside of their scheduled clinic time.

We are also updating the learning outcomes for this course by adding #7.
