This course complies with the credit hour policy:

Yes

Justification for course proposal:

There are changes to the pre-reqs for the course, as we make some curricular changes to our major. I'm adding ANTH 141 as an option for the pre-req, as both 141 and 146 provide the students with the background needed to be successful in the course. It also gives students another pathway into this course, and adding graduate student standing eliminates the need for office administrative staff to add graduate students manually.

We also added the ELOs, which were not previously within CourseLeaf.

Course Description: (Not to exceed 90 words and language should conform to catalog copy.)

Examines food and eating from an anthropological perspective. Demonstrates how food communicates social messages about individual or group identity, creates social boundaries or forges belonging, and can reflect one's politics, values, and ethics. Through ethnographic examples and attention to global processes, this course explores food production, circulation, and consumption.
