Justification for course proposal:

A majority of the advanced practice nursing organizations are proposing the Doctor of Nursing Practice (DNP) as entry into advanced practice. A DNP degree offers several benefits that can shape an individual's health care career, opening new opportunities, building on specialized knowledge, and improving performance. Therefore, the School of Nursing applied to have a DNP program added to the campus master plan and received approval spring 2024. This course proposal is for one of the required courses in this new program.

In addition to meeting CSU requirements for doctoral education and postsecondary faculty preparation, this course will be part of a program accredited by the Commission on Collegiate Nursing Education (CCNE). CCNE standard include 29 "Essentials" for curriculum and requires 1,000 practicum hours and that students become eligible for an advanced certification (Certified Nurse Leader (CNL®), Nursing Professional Development (NPDTM), or Certified Nurse Educator (CNE®)). This course covers:

Essentials: Doctoral Education #1. Clinical judgement, #4. Diversity, equity, and inclusion, & #8. Social determinants of health; Nursing Practice #1. Knowledge of nursing practice, & #2. Person-centered care; Core Concepts #8. Advanced nursing practice

Certifications: CNL #4. Care coordination

Course Description: (Not to exceed 90 words and language should conform to catalog copy.)

Conceptual and systematic study of the pathophysiology of disease states and conditions, relationship to the Social Determinants of Health, treatments, and implications for patients and healthcare providers. The focus is on identifying, understanding, treating, and preventing disease processes. This knowledge will be built upon by the concurrent enrollment in Advanced Pharmacology.
