Justification for course proposal:

A majority of the advanced practice nursing organizations are proposing the Doctor of Nursing Practice (DNP) as entry into advanced practice. A DNP degree offers several benefits that can shape an individual's health care career, opening new opportunities, building on specialized knowledge, and improving performance. Therefore, the School of Nursing applied to have a DNP program added to the campus master plan and received approval spring 2024. This course proposal is for one of the required courses in this new program.

In addition to meeting CSU requirements for doctoral education and postsecondary faculty preparation, this course will be part of a program accredited by the Commission on Collegiate Nursing Education (CCNE). CCNE standard include 29 "Essentials" for curriculum and requires 1,000 practicum hours and that students become eligible for an advanced certification (Certified Nurse Leader (CNL®), Nursing Professional Development (NPDTM), or Certified Nurse Educator (CNE®)). This course includes practicum hours and covers:

Essentials: Doctoral Education #1. Clinical judgement, #3. Compassionate care, #4. Diversity, equity, and inclusion, & #8. Social determinants of health; Nursing Practice #1. Knowledge of nursing practice, & #2. Person-centered care; Core Concepts #8. Advanced nursing practice

Course Description: (Not to exceed 90 words and language should conform to catalog copy.)

Advanced concepts and skills in health and physical assessment are essential to the clinical decision making and caring process for the nurse pursuing advanced degrees. The emphasis is on eliciting an accurate and thorough history considering the client's multiple dimensions. Competent physical examination skills and documentation are further developed to provide a database for nursing diagnoses and clinical judgments in preparation for advanced nursing practice. Individual practice outside of class is required.
