Does this course require a room for its final exam?

No, final exam does not require a room

Does this course replace an existing experimental course?

No

This course complies with the credit hour policy:

Yes

Justification for course proposal:

Physics 504, is one of the possible culminating experiences proposed as part of a new Master of Science in Physics. The MS program is designed to allow flexibility for students to prepare for PhD programs or to prepare for a career in teaching, industry or government. The MS in Physics will provide a locally accessible pathway for students interested in pursuing advanced physics degrees. Diversity in physics will be increased by supporting the CSUS community of students at the graduate level. Many of our underrepresented and low-income students are helping to support families while studying and would be unable to pursue graduate education outside of the Sacramento region. Across the country women and underrepresented groups face barriers at entry and at each step throughout their physics careers.

Course Description: (Not to exceed 90 words and language should conform to catalog copy.)

Master's exam: This is a culminating experience for the master's program. Students will review the material of their completed courses in the physics program in weekly sessions with the course instructor. A written and oral examination will be completed.

Are one or more field trips required with this course?

No
