

# MS IN APPLIED BEHAVIOR ANALYSIS

## What is Applied behavior Analysis?

Applied behavior analysis (ABA) is the field of Psychology that focuses on understanding the environmental variables that reliably influence human behavior and developing individualized programs to target socially significant behavior.

## How does our program prepare you?

The ABA program prepares students to work as behavior analysts in a variety of settings and the program coursework fulfills the requirements to sit for the Behavior Analysis certification exam. This program is also appropriate if you are interested in eventually entering a doctoral program.

## Clinical Opportunities

The ABA program offers different funded internships and job opportunities for students in the program to gain clinical experience working under Board Certified Behavior Analysts. This clinical experience is an essential part of the program.

## Research Opportunities

Students can participate in a variety of basic and applied research topics. Our research facilities include research rooms for data collection with children, adults, and animals (rats).

## Student Association for Applied Behavior Analysis (SAABA)

SAABA's mission is to promote the study of ABA by providing its members with opportunities in the field through social networking, workshops, conferences, and guest lecturer events.
